## *Few pics of our previous batches*

## What few previous participants say about our implant training courses?

I was really over-conscious when joined Dr. Ajay's implant course coming all the way from Libya and had no knowledge about the implants. But I am really thankful to dr ajay and dr sunita, as after joining their implant course, now I am placing implants in my clinic and using multiple systems. Dr Ajay is really a talented guy and good teacher too.

-----Dr. Ahmed Ameen, Libya Email: [drahmeddentist@yahoo.com](mailto:drahmeddentist@yahoo.com)

Dr. Ajay's implant training courses are really good, I learned a lot about the dental implants and would recommend every dentist to join Dr. Ajay to learn the dental implantology.

Dr. Naboya Maria Nigeria Email: [a2zdent@yahoo.co.uk](mailto:a2zdent@yahoo.co.uk)

I would like to thank Dr. Ajay and Dr. Sunita for your teaching and your help to make me learn implants. Dr. Ajay is really a very good teacher and also a talented person. During my course I was feeling as I am in my clinic and with my family therefore i learned implant in a very easy way.

Dr. Bashar A. Salman, Bagdad (Iraq) MAIL- [bashar\\_asm@yahoo.com](mailto:bashar_asm@yahoo.com) Contact no. +964790611

I am very grateful for dr ajay to make me learn all the important things about implantology. From the first day of the course I feel lucky to be one of the participants. Dr. Ajay and Dr. Sunita both have simple personalities so participant feel very comfortable. I got new friends i travel a long way from my country to India but now I feel it was worth.

Dr. Bassam Rehab, Oman Mail- [bassam\\_rehab@yahoo.com](mailto:bassam_rehab@yahoo.com) Contact no. 0096892485861

I am a pedodontist in Kenya and accidently discovered this course via internet. I was really apprehensive at first about the authenticity of this course. I registered for the 9 days course, booked a flight to India to learn implants from Dr. Ajay but after my training I am very glad for I made a right decision. Dr. Ajay is a very talented teacher as he simplifies all the technical jargon to the point any novice will understand. The one on one training that i received ensured that I could ask all the 'silly' questions and yet get back a brilliant answer. The ambience of his center is very conducive to learning implants you will practically get to witness all the stages of implantology from the planning stage with CT software up to the delivery phase. I was allowed to see many implant insertion and prosthetic procedures and also to insert implant in patient's mouth under his guidance. Now just after 9 days training I feel very confident to use any implant system at my center. I have no hesitations recommending dr. ajay to any dentist worldwide for the implant training.

Dr. Humphrey M. Muriithi (Nairobi, Kenya) Mail- [muriithih@yahoo.com](mailto:muriithih@yahoo.com) Contact no. - +254 722 288891

I had no knowledge about the implants before I joined their course but after joining this course now I am successfully placing implants in my own clinic. The best part of this course is very friendly behaviour of dr ajay and dr sunita so the participants feel very comfortable to discuss their queries. Dr ajay remain very supportive for the planning of your own cases in your clinic after the course so you feel very comfortable in your implant practice if your teacher is above you to help any implant procedure at last I could find a best implant teacher and suggest every dentists to go and learn implants from Dr. Ajay.

Dr. Rohit Sharma, himachal Pradesh Email- [healintouch@rediffmail.com](mailto:healintouch@rediffmail.com) Contact no 094184744

I am very thankful to Dr. Ajay who gave us 9 days clinical implant training at his own center. because of his excellent way of clinical training, I hope I will do best in implants. he is very particular about his work. I saw many implants patients in his clinic which really helped me to learn the best. I am fully satisfied with his training and suggest every body to prefer this center to learn implants.

Dr. Nasim Ali, Katihar ( Bihar) contact no. 09358027273

Dr. Ajay taught the dental implants in detail and made it quite easy to learn this advanced technique. He has the best infrastructure, equipments and audiovisuals to teach dental implants. The best part of this course is that it's not a particular implant system based course but we learn multiple implant systems during this course so that we can choose any of the system according to our patients to start the implants practice.
